Fuzzy logic is a "real world" approximator and it has been used in a wide scale towards risk modeling and especially in the case of environmental or natural hazards [13].

The former strategy (1) is suitable for a Programmable Logic Controller (PLC) using Boolean logic, and the latter (2) is suitable for a fuzzy controller using fuzzy logic. Our aim here is not to give implementation details of the latter, but to use the example to explain the underlying fuzzy logic.

research in the area of fuzzy sets development for ISBSG database as well as the im-plementation of fuzzy sets using Bayesian networks. ISBSG is a large data set and development of Fuzzy rules and fuzzy sets for this database is itself a great task. Thus it is proposed that a research to be carried out to develop an fuzzy logic based intelli-
