ACM India Research Board (AIRB) What is AIRB? ACM India Research Board (AIRB) is a community of academics, researchers, and others who care deeply about enhancing the quality and the quantity of computing research done in India, particularly in the academic institutions.

ACM India

I have one of the best jobs in the industry – pursuing un-tethered research, shepherding brilliant researchers and helping shape Microsoft's long-term strategy through research, industry partnerships, and associated policy engagement with governments and research institutions around the world.

Victor Bahl at Microsoft Research

Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which then communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics of distributed ...

Parallel computing is a type of computation in which many calculations or the execution of processes are carried out simultaneously. Large problems can often be divided into smaller ones, which can then be solved at the same time. There are several different forms of parallel computing: bit-level, instruction-level, data, and task parallelism. ...

Parallel computing - Wikipedia

"This book is a timely addition designed to bridge the gap between statisticians/computer scientists and

experimentalists (biologists, physicists, medical doctors) by focussing on solutions to practical problems â€l . the book also provides hands-on examples and exercises for a better understanding (for which the solutions are included at the end of the book).
