Control Systems PPT | PowerPoint Presentation | PDF: A system is a combination of number equipment or
components connected in a sequence to perform a specific function. In a system, when the input quantity is
controlled by varying the input quantity then the system is called as a control system.

1-Control Systems: A system is a combination of components that act together to perform a specific goal.
2-Reference input: It is the actual signal input to the control system. 3-Controlled variable (output): the
quantity that must be maintained at prescribed value. 4-Disturbance: An unwanted input signal that affects
the output signal.

$\hat{\phi}$ The control input $u(k)$ is the setting of one or more parameters that manipulate the behavior of the target
system(s) and can be adjusted dynamically. $\hat{\phi}$ The controller determines the setting of the control input
needed to achieve the

8.2.1 What is an open loop control system? Reference input Controller Control input Plant (dynamical
system) Output Disturbance input Figure 8.6: A general open-loop control system Example. Electronic Fan
Switch Reference input: Switch on the fan (that is, press the switch and 230 V is applied). So, the reference
input is the 230 V signal.

Control Systems 8 If either the output or some part of the output is returned to the input side and utilized as part of the system input, then it is known as feedback. Feedback plays an important role in

INTRODUCTION TO ENGINEERING SYSTEMS Lecture 10: Feedback Control ... Input needed for desired of system output . 18 Mechatronics and Haptic Interfaces Lab Limitations of feedforward control Effects of disturbance or command input must be predictable May not generalize to other conditions

Types of Control: Open loop, feedback, feedforward

CONTROL SYSTEM DESIGN 19.5 If $y(t)$ is the displacement from the resting position and $u(t)$ is the force applied, it can be shown using Newton's law that the motion is described by the following linear, ordinary differential equation with constant coefficients:
