tunneling dynamics in open pdf

This chapter uses the findings and conjectures of the previous two Chaps.5 and 6 regarding the tunneling to open space process of many-body systems whereby the process may be controlled.

(PDF) Tunneling Dynamics in Open Ultracold Bosonic Systems

This thesis addresses the intriguing topic of the quantum tunnelling of many-body systems such as Bose-Einstein condensates. Despite the enormous amount of work on the tunneling of a single particle through a barrier, we know very little about how a system made of several or of many particles tunnels through a barrier to open space. The present work uses numerically exact solutions of the time ...
